🏛️ SCIT Web Programming - AI DISCLOSURE BLOCK

==========
File Name: Codes/personal-development.html, ../style.css

Student Name: Jada Hall

Student ID: 2510241

Assignment: CIT2011 IA1 - Web Programming

Date: 12/10/2026

🤖 GENERIC AI TOOL UTILISED (Check all that apply):

[X] GitHub Copilot [ ] ChatGPT [ ] Claude [ ] Gemini [ ] None

---

📝 SCOPE OF WORK & DEBUGGING LOG:

1. Specific Bug/Error Encountered:

The “Jump to” links had no matching target IDs, and I wanted those links to display vertically on mobile. I also wanted to remove the decorative mail icon before the résumé email address.

2. Exact Prompt Sent to AI Tool:

"when i open the wesite on my mobile device i have to zoom out each page"
"how do i have it do that on mobile"
"the hyperlinks to jump to dont work"

3. Resolution/Fix Applied:

AI assistance was used for targeted edits only: adding matching IDs to the jump-link sections in the HTML and adding CSS rules for the jump links on mobile. The rest of the stylesheet was not generated or replaced by AI.

⚠️ INTEGRITY VERIFICATION DECLARATION:

By submitting this file, I certify that the core algorithmic logic, program architecture, and data structures implemented herein are entirely my own authentic work. AI assistance was restricted strictly to debugging and/or generating explanatory documentation comments in full compliance with the course syllabus.
